Reliable | Affordable | Flexible

Your One-Stop Digital Signage Partner

Hardware, Software, Media, Interactive Touch Application, Network Deployment & Maintenance

HERO Technologies

Do it once. Do it right.

2017

Turnkey Digital Signage Solutions

HERO TECHNOLOGIES

We provide digital signage support for some of the largest, most recognised brands in the world. You've dined in their restaurants or been to their Quick Service Restaurants (QSR), bought your groceries at their stores, and are more likely to have shopped at their retail stores than any other brand. In fact, odds are you have walked past digital signage we support.

Installation, Provisioning & Project Management

From site surveys, planning and completing the installation, to complete project management, our team of experts and partners will get you up and running the right way the first time! We have installed, provisioned, and made operational over 240 locations and over 1200 screens.

On-Site Service & Repair

Our team of technicians repair and replace hardware with a first-call resolution rate of over 50%. We can also offer Hot Swap Inventory Management; we will house and manage your inventory of equipment for repairs and replacements.

Content Management Systems & Cloud Services

We are Content Management System (CMS) agnostic. We work with many of the major CMS providers: Scala, MagicInfo, MediaSignage, Google, CapitalNetworks, SmartAVI, SuperSign, ParkMedia. If you run on it, we can support it!

Creative Services & Content Creation

When you need it, we can help with the creation of your content. Our team of graphics designers, animators, and developers can create all kinds of interactive eye-catching creative content and have them 'signage ready'
